Meridian Completes Kubota Engine Expansion

Meridian Design Build recently completed a 100,280 SF building expansion to Kubota Engine America's U.S. headquarters in Lincolnshire, Illinois. The expansion, completed on a design/build basis, more than doubles the size of the company's facility there.

The expansion adds 81,880 SF of additional plant/warehouse space and 18,400 SF of space designed to serve as future offices. Site improvements were also completed to create additional employee parking to accommodate Kubota Engine America's future growth.

Peter Schmidt, Senior Vice President and Ryan Moore, Project Engineer coordinated the project for Meridian. Greg Suthers, Superintendent, managed work at the jobsite. Architectural services were provided by Timothy Morgan Associates and civil engineering work was completed by Manhard Consulting.

Meridian Design Build, a Member of the U.S. Green Building Council, offers full-service general contracting and design/build services to the industrial, office, healthcare, retail, hospitality, and commercial markets. More information on Meridian Design Build can be found at www.meridiandb.com.
