

Meridian will renovate this facility in Cicero, Ill.

Meridian selected for Cicero renovation

Cicero, Ill.

Meridian Design Build has been selected by C.R. Laurence to coordinate the renovation of a recently acquired 90,000-square-foot manufacturing facility in Cicero, Ill.

An extensive amount of interior demolition work and reconfiguration is planned to improve overall flow within the facility. It will make room for updated employee facilities such as plant restrooms/locker rooms, lunchrooms and plant offices.

An outdated electrical service will be upgraded to meet cur-

rent code requirements. Additional electrical distribution panels will be installed to accommodate reconfigured manufacturing lines.

Extensive remodeling/renovation work will also be completed within existing office areas including installation of a modern heating/cooling system, installation of new plumbing fixtures and replacement of corroded galvanized water lines.

The project is being completed on a design/build basis with the assistance of Itasca, Ill.-based Heitman Architects. Ryan Brandush and Tom McNett are handling the project for Meridian Design Build.
