

Meridian constructs I-80 truck terminal in I-80 Corridor

April 12, 2018 | [Staff Writer](#)

[Meridian Design Build](#) recently completed construction of a 112,500-square-foot truck terminal for CenterPoint Properties in Joliet, Illinois. The new facility is located on a 46.37 acre redevelopment site within the CenterPoint Business Center I-80.

The new truck terminal includes 17,930 square feet of office space, 169 loading positions and two drive-in doors. An adjacent, 22,176-square-foot maintenance building features 17 fully equipped service bays, a truck wash bay and a freestanding, 3,000-square-foot fuel/lubrication island. Additional construction includes 276 auto parking stalls, 301 trailer storage positions and 129 tractor stalls.

Demolition of existing underground utilities, building slabs and foundations was completed as a part of the project scope. Architectural and structural design services were provided by [Cornerstone Architects](#) while [Manhard Consulting](#) completed the civil engineering design.
