

June 19, 2008 7 - 11:30 am
5th Annual CIP Industrial Summit
Donald E. Stephens Conference Center
Rosemont, IL

Direction, Perspective and Opportunity

The 5th Annual CIP Industrial Summit addresses topics that are key to making the right moves in 2008. Industry leaders serve as our resources to explore the strengths, challenges and anticipated opportunities in Chicagoland's 1.3 billion sq. ft. marketplace ... when to be bullish, when to be cautious, and what lies ahead for the year.

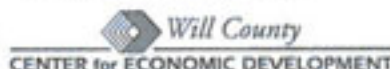

Topics of the 2008 CIP Industrial Summit may include:

Developer/Owner Direction—The development community's discipline from the prior year has been a great salvation for the market. This panel outlines the direction spec, build-to-suit and second-generation development is taking and what you need to know in positioning for the future.

Adding Value Construction and Design Build—In construction and design/build, it's all about creating value. Architects, contractors and others examine technological advancements and techniques that deliver what customers want in 2008 and beyond.

Finance and Investor Perspective—Chicago remains a great market for industrial product—well leased, income producing portfolios and vacant buildings with upside potential. This panel looks at who is buying, selling and financing.

Mid-year Transportation & Logistics Report—Moving product has never been more important. Experts look at the market at mid-year and offer a glimpse of what to expect, here in Chicago and around the globe.
