

Meridian Design Build Completes O'Hare Logistics Center

BENSENVILLE | Meridian Design Build has completed the O'Hare Logistics Center, a 12-acre business park owned and developed by Atlanta-based industrial development company Seefried Properties.

Located near Chicago O'Hare International Airport at the Southwest corner of Devon and Ellis avenues, the center consists of two speculative multi-tenant industrial facilities that total 188,160 square feet. The two buildings that comprise the center were designed to accommodate freight forwarding and cargo warehousing.

The design team included Cornerstone Architects Ltd. and civil engineering firm Hefner Associates. John Sharpe and Chris Nelson of Lee & Associates will handle leasing for Seefried Properties.
