Meridian Breaks Ground on Kubota Engine Expansion

Meridian Design Build recently broke ground on a 100,280SF building expansion for Kubota Engine America in Lincolnshire, Illinois. The project, which is being completed on a design/build basis, consists of 81,880SF of plant/warehouse space and 18,400SF of space intended to serve as future offices. Site improvements are also under way to accommodate additional employee parking for the growing company.

Peter Schmidt, Senior Vice President and Ryan Moore, Project Engineer are managing the project for Meridian Design Build. Greg Suthers, Superintendent, is coordinating work at the job site. Architectural services are being provided by Timothy Morgan Associates and Civil Engineering work is being completed by Manhard Consulting.

Kubota Engine America, a U.S. subsidiary of Japan's Kubota Corporation, is a manufacturing leader in the industrial engine market. Well-known for their compact diesel engines, Kubota manufactures engines for use in agricultural, construction, industrial, and power generation equipment. Their Lincolnshire headquarters is the hub for sales, engineering support, service, parts support, and distribution. More information on Kubota Engine America can be found at www.kubotaengine.com.

Meridian Design Build, a Member of the U.S. Green Building Council, offers full-service general contracting and design/build services to the industrial, office, healthcare, retail, hospitality, and commercial markets. More information on Meridian Design Build can be found at www.meridiandb.com.
