

## **Extensive Demolition and Upgrades**

Paul Chuma, president of Meridian Design Build LLC, reported that his firm completed demolition and extensive renovation work on an existing 250,000-sq.-ft. building acquired by Highland Baking Co. at 2301 Shermer Road in Northbrook. The facility, first constructed in 1971, required selective demolition, code required upgrades, re-roofing, process floor improvements, and customized mechanical, electrical, plumbing, and process piping upgrades for its new use as a bakery.

Larry Gamm, project manager, and Fred Jennings, general superintendent, are handling the project for Meridian Design Build. The architect is Dobrin + Associates, Ltd.

Highland Baking is a full-service bread company.
