

Meridian Design Build has finalized construction on a new 26,300-sq.-ft. two-story Innovation Center at Morey Corporation's Global Headquarters at Internationale Centre, Woodridge, increasing the company's square footage in the park to 121,500 sq. ft. The

facility will serve as a technical development, engineering and testing facility for all Morey's products. The project was completed with the assistance of architect, Schmidt Design, and civil engineer, Manhard Consulting Ltd. Peter Stadler, vice president, and Jim Cather, superintendent, headed up the project for Meridian.
