Meridian Starts Construction on Southeastern Wisconsin Project

Meridian Design Build recently broke ground on a 76,320 SF expansion to an existing seasonings plant in Sturtevant, WI for Kerry Ingredients & Flavours. The multi-phase design-build project will be completed in mid-summer 2014.

The fully air-conditioned warehouse addition will include 10 new loading docks and a secure spice storage area. Significant improvements will also be made within the existing plant to accommodate increased production output at the facility. This is Meridian Design Build's fourth project for Kerry Ingredients & Flavours since 2010.

Architectural services are being provided by Harris Architects; Pinnacle Engineering Group has been retained to complete civil engineering work for the project.

Meridian Design Build, a Member of the U.S. Green Building Council, offers full-service general contracting and design/build services to the industrial, office, healthcare, retail, hospitality, and commercial markets. More information on Meridian Design Build can be found at www.meridiandb.com.
