Meridian Design Build recently completed construction on a 320,988-square-foot package sorting and distribution center for developer Scannell Properties on a 37.4-acre site in Kalamazoo County, Michigan.

The new facility, built for a provider of global shipping and information services, is located at 6701 Portage Road in Portage, Michigan.

The new building includes 87 loading docks, eight drive-in doors, 196 interior van-loading positions and 10,441 square feet of office space. Significant site improvements were completed to accommodate a 602-car parking lot, 256 van staging spaces and a 185-stall trailer storage yard.

Meridian completed the project on a design/build basis with Precept, LLC providing architectural and structural design services and Paradigm Design handling the civil engineering design.
